

Vengold- SH: (Nutrients Efficiency Enhancer)

Benefits of Vengold- SH:

- Vengold- SH is a proprietary research product derived from various organic sources of plant origin by natural extraction process.
- Vengold- SH contains natural soil conditioning substances for improving Soil & Plant health.
- Vengold- SH have an excellent ability of holding water almost by 7 times of its weight, greater water holding capacity than clay soil.
- Vengold- SH enables roots to quickly access available nutrients required for vigorous plant growth and more yield with better quality produce.
- Vengold- SH increasing efficiency of fertilizers.
- Vengold- SH helps in supplying the nutrients to the crop which beneficial but not meet from soil.
- Vengold- SH helps to avail food for beneficial micro flora in the soil which helps in increasing the productivity of the soil & organic carbon.

Features of Vengold- SH:

- Vengold- SH is 100% organic product.
- Savings in 20 to 30% chemical fertilizers.
- Vengold- SH is completely safe for humans, animals, birds & the environment.

How to use Vengold- SH:

- Mixing with any chemical, organic or biological fertilizer.
- Through drip irrigation or drenching.
- Mixing with 40 to 50 dry soil.

Doses:

For Vegetable & Field Crops:

- 1) 1st Dose: At the time of sowing seeds or transplanting apply 500 gm per acre.

2) 2nd Dose: In the stage of flowering or fruit development apply 500 gm per acre.

For Fruit Crops:

1) 1st Dose: At the time of picking bahar or in peak vegetative growth stage apply 500 gm in soil.

2) 2nd Dose: In the stage of fruit setting or fruit development stage apply 500 gm in soil.

Precaution: Vengold– SH is compatible with almost all kind of fertilizers except highly acidic fertilizers.
